

**To: The President of South Africa, Petroleum Agency of South Africa (PASA),  
Dept Mineral Resources, Dept Water and Sanitation, Dept Environmental Affairs, Dept of Energy.**

I strongly object to the proposed exploration of the Matatielle and Umzimvubu catchment by Rhino Oil and Gas Exploration South Africa (PTY) Ltd. I understand that exploration for oil and gas could be the precursor to fracking. I understand that there will be serious environmental costs. The risk to soil and water health from gas exploration is unacceptable. It threatens the future of our children and grandchildren. I support sustainable alternatives to the fossil fuel economy. I ask that a full Strategic Environmental Assessment for any possible exploration area be completed.

 Dept Mineral Resources, Dept Water and Sanitation, Dept Environmental Affairs, Dept of Energy.

I strongly object to the proposed exploration of the Matatiele & Umzimvubu catchment by Rhino Oil and Gas Exploration South Africa (PTY) Ltd. I understand that exploration for oil and gas could be the precursor to fracking. I understand that there will be serious environmental costs. The risk to soil and water health from gas exploration is unacceptable. It threatens the future of our children and grandchildren. I support sustainable alternatives to the fossil fuel economy. I ask that a full Strategic Environmental Assessment for any possible exploration area be completed.
