

## UCPP NEWSFLASH #2: FEBRUARY 2017

### MEAT NATURALLY AUCTIONS - STATISTICS AND UPCOMING EVENTS

*The rangeland restoration and Meat Naturally initiative in the northern Eastern Cape has been driven by Conservation SA in partnership with local NGOs (LIMA, INR and ERS), as a collective under the Umzimvubu Catchment Partnership (UCPP) since 2013. This is outlined in the Rangeland Toolkit produced by the UCPP collective in February 2016, which can be viewed at [www.umzimvubu.org/toolkits/rangeland](http://www.umzimvubu.org/toolkits/rangeland)).*

Eight village based auctions have been hosted to date, benefitting more than 140 households directly with over R3,3 million in cash for almost 600 cattle sold straight off well managed rangelands. The approach is assisting with follow up maintenance on areas cleared of alien wattle, where increased access to grassland acts as an incentive to control regrowth as part of a managed grazing plan by livestock owners and traditional authorities. At Mzongwana village, this income can be translated into fulltime job equivalents: sound pastoral lifestyles can be beneficial for ecological infrastructure as well as livelihoods. Two auctions translate into full time equivalent income for more than 30 people, as shown below:

	<b>JUNE 2016</b>	<b>NOVEMBER 2016</b>
<b>TOTAL SALES</b>	R400 250.00	R585 550.00
<b>TOTAL OFFERED</b>	128	118
